

TECHNOLOGY STUDENT ASSOCIATION WORK LOG

Date	Task	Time involved	Team member responsible (student initials)	Comments
11/12/2024 1.	Task was to plan the website structure like the index/home page, charities, search, form, and reference page.	45 minutes	A.E, S.N, A.L	This was to plan out our structure on VS code and which folders were going where like CSS in its own folder inside the project folder with images, and U.S. being separate and HTML being in the project folder.
11/18/2024 2.	Build the homepage, hero section, and navbar	60 minutes	A.E, S.N	We added the initial homepage with all css styles and even added the first images with its own folder.
11/22/2024 3.	Created the charities page and researched organizations.	90 minutes	A.E, A.L	We created the charities page and linked it to the home page while also styling it and trying to make the styling of the home page better. We also researched about charities so we can verify the information for the charities page.
12/01/2024 4.	Built the search page with the Java script filtering	120 minutes	A.E, A.L	We created the html and css of the search page which wasn't too hard and func reacting the search bar looks, but the JavaScript was a bit of a struggle as it is no one in our group's strong suit. We eventually did it though with the help of guides, and learning courses and it helps filter through the charities.
12/05/2024 5.	Completed form page html/css and the JavaScript submission output.	120 minutes	A.E, S.N	We added the form page of html and css which was not hard at all and then the JavaScript for the form submission which wasn't too hard as adding submit button and checking if all entries of forms are filled isn't too hard, the hardest part was showing the output.
12/08/2024 6.	Created the reference page html/css, added citations to sources like charities, and uploaded the pdfs and code.	75 minutes	A.E, S.N, A.L	We did a final cleanup, and did final improvements to the looks of the CSS And then added the reference page, added citations and uploaded the docs.
